**DUPONT FORMS ALLIANCE WITH
TECHSAGE FOR USE OF DYLUX®
DIGITAL MEDIA ON SPINJET 1000**

*Dylux®, and SpinJet 1000 offer automated solution for accurate
two-sided imposition proofing.*

WILMINGTON, Del., March 30, 2001 -- DuPont Color Proofing announced today an exclusive worldwide alliance with Techsage for the use of DuPont's double-sided Dylux® Digital imposition proofing media on the SpinJet 1000 from Techsage. The SpinJet 1000 uses an advanced fully automated paper handling system to produce two-sided Dylux® Digital proofs, which allows users to visually check data and electronic stripping prior to the crucial step of outputting plates or film. The Dylux® Digital proof produced on the SpinJet 1000 is extremely accurate front to back, and can be folded, trimmed and stapled for presentation to the customer along with a color proof for final approval.

Craig Reid, digital proofing business manager from DuPont Color Proofing said, "DuPont has been the market leader in imposition proofing ever since DuPont invented the Dylux® blueline over 30 years ago. As the industry moves to more digital proofing, we are committed to the ongoing development of technology and alliances such as this one with Techsage that allow us to bring the best possible solutions to our customers."

Erik Kasper, Director of Techsage said, "The use of Dylux® Digital media on the SpinJet 1000 is the final link in providing the ideal solution to one of the major drawbacks in a completely digital workflow; the ability to produce a double-sided, accurate imposition proof prior to CTP or CTF output."

The SpinJet 1000 from Techsage combines an innovative non-impact printer accessory to either the Hewlett-Packard (HP) DesignJet 1050C or 1055CM large format printer, enabling fully automatic printing of double-sided imposition proofs. Since its introduction, the SpinJet 1000 has established itself

as the worldwide market leader in automated dual-sided imposition devices.

Dylux® Digital media for the SpinJet 1000 is a high quality specially coated paper that offers bleed control, sharp line resolution, fast drying and curl resistance. Dylux® Digital media will ship with every new SpinJet 1000. Both the Dylux® Digital media and the SpinJet 1000 are available from selected distributors and dealers worldwide.

About TechSage

Techsage is a Purup-Eskofot subsidiary based in Denmark and founded in the spring of 1999. The purpose of Techsage is to create new concepts and solutions for strategic areas of the pre-press workflow, which have not been addressed by the mainstream vendors. Thereby Techsage strives to optimize the overall pre-press system solutions in quality and performance to the benefit of end-users, system vendors and their sales channels. For more information on Techsage and the SpinJet 1000 visit our website at www.spinjet.com or www.techsage.dk.

About DuPont Color Proofing

Based in Wilmington, Del., DuPont Color Proofing is the world's largest supplier of proofing products offering the widest variety and most precise digital, analog and imposition proofing systems possible for use throughout the workflow, anywhere in the world. Other Dylux® products include; Dylux® Thermal for 830nm platesetters, Dylux® Digital media for inkjet wide format printers such as the HP, Encad and Epson, and Dylux® instant imaging proofs from film.

DuPont is a science company, delivering science-based solutions that make a difference in people's lives in food and nutrition; health care; apparel; home and construction; electronics; and transportation. Founded in 1802, the company operates in 70 countries and has 94,000 employees.
